Enjoy breathtaking views of Camelback Mountain and downtown city lights from this extensively remodeled contemporary home. Almost four-hundred thousand dollars in renovations have been made in the past few years, which has made this home simply striking. An impressive 45 foot great room with tongue and groove wood ceiling and dramatic angled 22 foot floor to ceiling windows bring the outside and limitless views inside. The adjacent modern and bright island kitchen features European cabinetry and stainless steel appliances. A private master suite has a massive stone fireplace, which separates the bedroom from the spa master bath with a large vanity, soaking tub and separate shower all surrounded in luxurious marble. Entertain on the rear patio or covered balcony while enjoying the views.
