Spectacular views of Camelback Mountain from all the main living areas in this 2006 contemporary remodel by Architect, CP Drewett. Walk into soaring ceilings, floor to ceiling windows and a modern open floorplan. The perfect entertainment spaces with wet bar seating, large open fireplace, kitchen open to the views with Wolf and Subzero appliances, even a large teppanyaki grill as the star of the show surrounded by a large granite island with seating. A 2012 pool and landscape renovation provide for private serene patio spaces with lush desert plantings. A paved circular drive provides ample guest parking. And did I say big Camelback views!
